

## Best In Class

Optoma's TX542-3D is designed to meet the demanding requirements of school districts and businesses. Bright, high-contrast images provide easy-to-read text, while a built-in closed captioning decoder displays text from videos that have closed captioning embedded in the signal. Wired networking allows remote management and control of the projector, and a built-in 10-watt speaker system outputs volume required for larger audiences. Optoma backs the TX542-3D with three years of Express Replacement Service and a one-year lamp warranty to provide added peace of mind.

3D content can be viewed with active LCD shutter glasses when the projector is connected to a computer with a compatible 3D graphics card. Please visit [www.optoma.com](http://www.optoma.com) for more information.
